

20 years delivering dependable, global QAD Data Collection

INTRODUCING THE NEW ZEBRA TC70 TOUCH MOBILE COMPUTER

YOUR FRONT LINE TO A SMARTER ENTERPRISE

Your employees need enterprise class handheld computers to communicate and access information seamlessly in order to work more efficiently and better serve your customers – yet they want a device that is every bit as refined and easy-to-use as their own consumer devices. Now, you can give them both with the TC70. Mobility Extensions (Mx) turns Android™ into a true enterprise-class operating system.

The rugged design holds up even in the most demanding environments and the TC70 can double as a two-way radio. You can automate the capture of just about any type of business intelligence with the embedded scanner and camera. The full complement of accessories and cutting edge technology will serve your business for years to come, for an unsurpassed return on investment. Real competitive advantage – delivered.

RUGGED, RELIABLE & FUTURE PROOFED TECHNOLOGY:

The TC70 will operate reliably after multiple drops to concrete, while IP67 sealing ensures a device that is dust-tight and can survive complete

immersion in water. The Corning Gorilla Glass 2 touch panel and scanner exit window bring a new level of durability to two of the most vulnerable components.

The TC70 features Android's KitKat operating system and Extensions (Mx), a series of features that provide security, device management and more to transform Android into a true enterprise-class OS. Designed for today's most advanced data entry and capture solutions, the TC70 blends a 4.7-inch HD display, an all-touch, worker-friendly interface as well as an embedded 1D/2D scanner and 8 MP camera. Crystal clear audio with up to 4x the loudness of smartphones and noise cancellation ensure users experience powerful audio communication. Accessories including the unique Share Cradle universal multi-bay cradle, allow users to easily tailor the TC70 to meet the needs of many different types of tasks.

CUTTING EDGE FAST DATA ACCESS & FEATURES:

Work more efficiently and better serve your customers by giving your employees enterprise-class handheld computers that survive life in the field or shop floor, communicate and access information in real time. Features include;

- 4G/LTE (TC75 only) and 8.02.11a/b/g/n connectivity for anywhere, anytime access to information
- Zebra's Mobility Extensions (Mx)
- Mobility DNA, a suite of mobility enabling applications, development tools and utilities
- Most advanced scan engine with longer range data capture capability
- Rugged and ready for every day enterprise use inside and outside the four walls

Please contact your Eagle representative to discuss your device requirements.
